

Mobile Plant: Access all areas

We come to you.

The inexpensive, highly mobile asphalt mixing plant, with quality assured.

High Quality Through and Through

Topcoat Asphalt can meet all your asphalt project requirements anywhere in Australia with our mobile production facility.

The mobile production facility is truly mobile and can be established and operational within 24 hours of arriving on site. Supported by a dedicated mobile production team we become an integral part of your project.

The mobile production facility is capable of producing a wide range of mix types meeting the specifications of state road authorities, local councils, airports and special projects.

EPA (SA) Licence #2777 is specifically assigned to the mobile plant and permits operation in regional areas or within proximity to residential areas.

Included with the mobile production facility is a fully NATA accredited laboratory to ensure material and asphalt testing is completed to the highest standard.

Developed to suit any project scope: from a basic, low-cost option to comprehensive road surfacing project. The plant can be mobilised, outputting 60t/h.

Why use a Topcoat Mobile Plant?

Topcoat Asphalt has the ability to deploy our mobile plant to suit any project, at any location within Australia.

Why use a Topcoat Asphalt Mobile Plant?

- Can be established quickly and proficiently in remote locations
- On-site material and asphalt testing ensures quality and efficiency
- Available for short and long term project needs
- Flexibility to configure to suit the project and the location
- EPA Licenced, subject to site specific notifications.

Features

- Can suit any project scope: from a basic, low-cost option through to major projects
- 60 tonnes per hour capacity - 5 feeder drum mix
- Automated aggregate weigh bins
- Compact, functional & self-contained
- A NATA-accredited laboratory can be set up on-site
- 4 Semi-Trailer Components
- Truck mounted Production Office
- Self bunded fuel tank, generator and baghouse (dust containment) system.

Built to be mobile

The Topcoat Mobile plant creates efficiencies, delivering uncompromising quality and service immediately to the doorstep of your project.

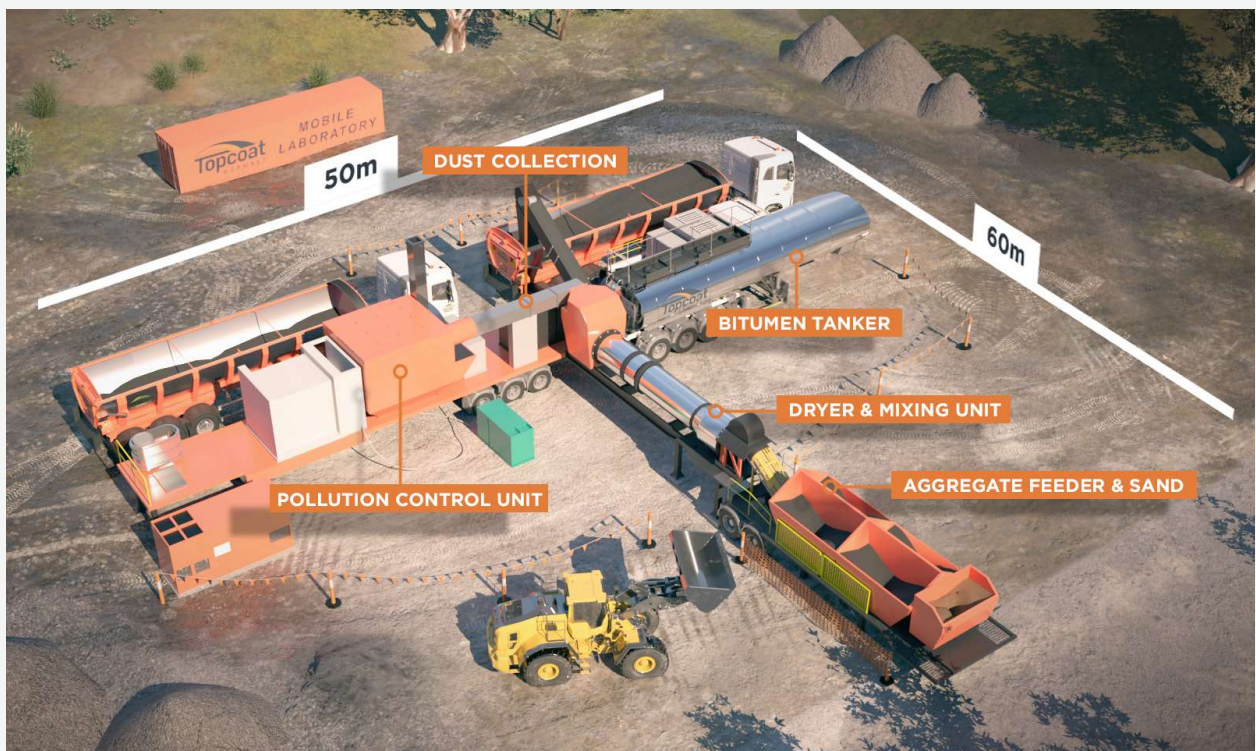

The mobile plant, with its own power generator and pollution control unit has a strong focus on safety and pollution-waste management.

Using the mobile plant attracts opportunities to engage local industry and resources, further benefiting the local economy.

The mobile laboratory delivers efficient project insights ensuring optimised output, helping keep your road surfacing project on time and on budget.
